*"We are crossing a critical stage that requires a deep reflection and to get in touch with the most organic of our holistic being, a return to the original roots in the nature where all our systems are immersed, in search of the purity and the innocence that would allow us to liberate of the dregs and adiposities of these times of vices and corruptions. We need an extension of the individual conscience to become fully aware and to place ourselves where it correspondsto us, to synchronize our consciences and resources, and to join in a platform under the humanist principles of freedom, justice and social transformationin the MorenianSociatry".*
